

UV Sensory Waterfall

A wall mounted sensory waterfall effect which glows brilliantly when used with a UV light. Even under everyday white light the colours radiate much more intensely than competing products. Created from strips of PVC, the waterfall stimulates the visual senses whilst also providing a great tactile experience.

We have also incorporated a unique cantilever mounting bracket, allowing for secure fixing and much more freedom in the positioning of the Waterfall. As the image shows, our Waterfall system can easily be installed on walls, or above doors, and swung out ready for use. The PVC used in this product is certified phthalate free.

TECHNICAL SPECIFICATIONS

Main Bar Extrusion	38mm diameter aluminium, finished in white
Mounting Bracket	Aluminium, finished in white
PVC Type	Flexible PVC, medical compound - TOTM plasticised
PVC Colours	Red, green, blue, pink, orange
PVC Tensile Strength	17MPa (@500mm/min)
PVC Elongation at Break	286% (@500mm/min)
PVC Cold Flex Temperature	-10°C

PRODUCT ORDERING CODES

Ordering Code	No. of PVC Strips	Tube Length
UVW10	30, each at approx. 20mm wide	1 metre
UVW12	37, each at approx. 30mm wide	1.2 metre
